

Innovations in the Breast Cancer Pathway

Move towards more personalised care and ensure best quality of life by engaging with practical guidance and new treatments

[View the homepage](#)

Key agenda details:

- Achieving timely, patient-centred care
- Personalising diagnosis and care through technology
- Strengthening your MDT for optimal productivity
- Toxicity management
- Novel pharmacological treatments
- Novel hormone therapies
- Revolutionising detection and treatment

Our last Breast Cancer focused day was held online in 2023, see what our attendees had to say and book your place for 2025!

"Met my needs entirely as a Breast Oncology nurse."

- Royal Devon University Healthcare NHS Foundation Trust

"Great talks, better understanding of treatments available and the complexity of pathways."

- York Breast Imaging Unit
